# ClearCompany Outranks the Competition

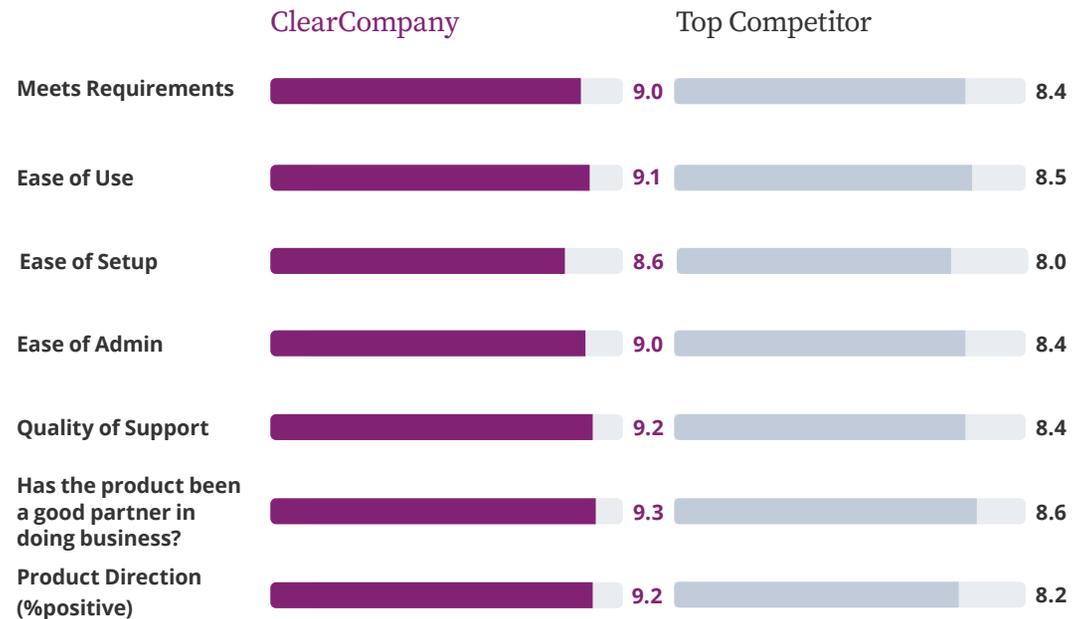

When we go toe-to-toe with our biggest competitors, ClearCompany comes out on top.

## “Fantastic ATS, Even Better Customer Service.”

“Hands down, ClearCompany has the best customer service that I have seen with software companies. As a client, I have my own Customer Success Manager where I can ask any questions needed, and a dedicated support chat for any other questions that I have.

Their ATS functionality is also extremely easy to use and is very consumer-driven, with ClearCompany posting updates and constantly evolving their product. ClearText is a prime example of this.”

ClearCompany earns high ratings on leading software review sites.

## Why do these badges matter?

**Software Advice FrontRunners** are scored based on a combination of Usability and Customer Satisfaction ratings. Like G2, scores are derived from real software users' reviews, as well as other public data. Usability is determined by averaging clients' ratings for functionality and ease of use, and Customer Satisfaction by averaging ratings for value for money, likelihood to recommend, and customer support.

**The Capterra Shortlist** is compiled based on Ratings and Popularity. Ratings are the product's overall average user ratings, and Popularity is a measure of user interest and relevance determined by search volume and other search data.
